

1st person:

1.introduction.

2.about project

3.small snippet of basic kernel code.

4.ST

```
{  
    int i;  
    char c;  
    char *p;
```

```
}
```

5.void main()

```
{  
    char *c="abcde";  
    c[0]='z';  
    printf("%s",c);  
}
```

6.int *i=0;

*i=5;

7.about volatile keyword.

2nd person:

1.introduction

2.set,clear,toggle bits

3. An array with 0's,1's,2's, which sorting mechanism is used.

4. About quick sort and time complexity

5.what is page table
